## Now more than ever — Give her a Hoover — and you give her the best —

*Christmas Eve* and the last gift of them all, slipped stealthily under the tree after she's gone to bed... a man's gift to his wife... for a merrier Christmas and happier years to come.

Note: Christmas Hoovers come in smart modern cellophane wrappings—delivered that way by the stores that sell them.

Just in time for Christmas, Hoover has introduced the first basically new cleaner in ten years—the most efficient cleaner ever built... made with new metal—magnesium—one-third lighter than aluminum... New streamline beauty—designed by Henry Dreyfuss. Non-marring ripple finish in stratosphere grey (easy to keep clean)... a complete cleaning ensemble—not only a cleaner for rugs but tools for all other furnishings, attached in one second without turning the cleaner over or even stopping the motor... new efficiency—stronger suction with even quieter operation... Automatic Rug Adjuster—for most efficient cleaning on rugs of any thickness... Time-to-Empty Signal—Red disc tells you when bag's full... Dirt Finder sheds broad beam of light ahead of cleaner. Many other new work-saving features plus exclusive Hoover principle of Positive Agitation which gets out destructive embedded grit and keeps rugs bright and fresh and prolongs rug life.

**New Back-saving Lightness**  
—because of new wonder-metal

You know how light aluminum is. Well, aluminum is half again as heavy as magnesium, which is used in this new Hoover. Amazingly light and perfectly balanced, this new Hoover may be taken to any part of the house with a minimum of effort.

**Startling New Feature**  
—Simply plug a Connector into a slot in the side of the cleaner and you're ready to use cleaning tools. No turning over cleaner. No disconnecting belt. One simple operation. Easy. Fool-proof. Safe.

**Tools for Everything**  
—upholstered furniture, draperies, bare floors, lamps, radiators, walls, radios—everything—all put up in a Handy Cleaning Kit which may be hung on door knob or stood in chair when in use and hung in closet between times. No extra charge.

## THE HOOVER 155 CLEANING ENSEMBLE

IT BEATS AS IT SWEEPS AS IT CLEANS

The New Hoover Cleaning Ensemble is now on display at leading stores, and is being shown by representatives of these stores who call at your home. Your local Hoover dealer will be glad to leave a Hoover with you for your trial use, without obligation. It may be purchased on surprisingly low terms—as little as . . . . .

## THEY CANNOT INTER THEIR DEAD!

The photo at the left shows a casket being carried to the tower. The above view includes a corner of the real cemetery, where all available earth has been scraped together and walled in to prevent drifting

## "Don't worry about me —it's just a Cold"

Just a cold now—but it may lead to influenza or pneumonia which, on an average, cause over 8,000 deaths each year in Canada. About half of these deaths occur in December, January, February and March.

THE common cold is bad enough in itself. But the real danger is that it may blaze the trail for more serious diseases or reduce your resistance to their attacks.

Before you realize it, what you think is just a "cold" may develop into influenza or even pneumonia. Don't forget that pneumonia may also start suddenly, even without a cold.

The first symptoms of pneumonia are usually chilliness or a severe chill, pain in the chest or side, headache, cough, and fever. Such symptoms mean that not a second should be lost. Go to bed and send for your doctor. Remember that pneumonia is a communicable disease. Proper nursing, complete rest and reasonable isolation are absolutely essential.

Lobar pneumonia is caused by many different types of the pneumonia germ—but each type is specific and can be identified. Should anyone in your family have pneumonia, your doctor will probably arrange for an immediate laboratory examination of the sputum to determine which type of pneumonia is present.

Serums are available which are

highly effective in treating certain of the types. Not all cases of pneumonia should have serum treatment. Your doctor will decide.

Pneumonia is a serious infection, but with the increasing defenses, medical scientists hope to reduce its heavy toll. During the next four months it will do the most damage to those who are not on guard. If your physical resistance is lowered by overwork or unusual fatigue, too little sleep, overindulgence in food or drink, or exposure to cold and wet, pneumonia germs may gain quick headway.

At this time of the year it is a wise precaution to have your doctor look you over very carefully to see whether or not you have diseased tonsils, sinuses, adenoids, teeth, or other physical impairments which may lower resistance.

You will be much safer during the coming winter months if you keep your vitality high.

Send for the Metropolitan's booklet, "Colds, Influenza, Pneumonia," which contains valuable information about the prevention and care of these diseases. Address Booklet Department 12-W-36

# FOR OUT-OF-DOORS

A new idea in accessories: matching bag and scarf, in this case of soft Scotch woolen in dark green and white plaid. The bracelet is gold with antique amber bangles.

A hip-length cape and sable scarf lend an air of femininity to this man-tailored suit of gray wool, with a chalk stripe of white and another pink stripe of rust.

Tunics are still the best things in the fashion picture. Here is one of wool in two shades of green worn by Lucille Ball of the films. The hat of stitched green wool is topped off with a curled lacquered black feather.

Black Persian lamb is one of the smartest of this season's furs, and it's young-looking, too, when made like this one with the perky off-the-face hat to match.

The season's newest hats are grand for petite ladies, for they add inches to the stature. This model of black antelope has a conical crown and bow trimming, and is the perfect complement for furs.

Woodbury's Facial Soap

MADE IN CANADA

NO LONGER need this be a drab and sunless world for women who lack beauty! For a new element in Woodbury's Facial Soap...Vitamin D...produced by the exclusive "Filtered Sunshine" process, can make your complexion lovelier, your skin all over, finer and smoother.

### Original Formula Enriched

Now, by an exclusive, patented process, one of Woodbury's costliest ingredients is irradiated. This process, by which only the beneficial rays of "Filtered Sunshine" are used, creates Sunshine Vitamin D in the soap. The result of a great scientific discovery by Woodbury skin scientists working in collaboration with one of America's foremost universities.

The gentle qualities of sunshine, in the form of Vitamin D, are readily absorbed by your skin to keep it fresh, fine-textured, blooming.

Has this new development increased Woodbury's price? Not at all! You get the same generous size cake of Woodbury's which for years sold at a quarter, for only ten cents.

Use Woodbury's every time you wash and bathe. Keep the family well supplied with Woodbury's, too. At drug, department, ten-cent stores, and grocers.

**YOU CAN IMPROVE YOUR BEAUTY**...without risking a cent! Buy 3 cakes of Woodbury's. Use 2 full cakes. If Woodbury's does not make your skin noticeably finer and fresher...return to us before January 31, 1937, the unused cake in wrapper (seals unbroken) and the wrappers from the 2 used cakes. Tell why you were not satisfied with Woodbury's...also the amount you paid for 3 cakes. Your money, plus postage, will be promptly refunded. Address: John H. Woodbury, Ltd., Dept. 842, Perth, Ontario.

## Safely into Childhood . . . critical Baby Days over!

But what a tremendous responsibility the Dionne Quintuplets were. Just tiny babies—so helpless—so dependent on others during those first two critical years. Mother! Here is news that is vitally important to you—and your baby. Libby's have made a great discovery which makes baby's solid foods finer—smoother—softer. The Dionne Quintuplets thrived on Libby's Homogenized foods during their critical baby days. It is Libby's special method of Homogenization which makes vegetables, fruit, cereals and soup far finer, far smoother than strained foods.

#### This is What Homogenization Does

The special Libby method of Homogenization "explodes" whole food cells formed in vegetables, fruits and cereal. The tough cellulose wall that surrounds the nourishment in these cells is completely broken up. All nourishment is released so that baby can digest it easily, quickly and completely.

Homogenization also breaks up coarse, irritating fibres. None of the bulk that baby needs for normal elimination is lost . . . but it is broken up into particles which do not irritate.

Homogenization is the first great advance over strained foods. Doctors find Libby's Homogenized Foods are better for babies in three important ways:

1. Fewer Digestive Upsets  
Doctors find Libby's Homogenized Foods far easier for babies to digest than the finest strained foods. Enthusiastic mothers write that since feeding Libby's Homogenized foods their babies have fewer digestive upsets.

#### 2. Far More Nourishing

Scientific tests show that Libby's special process of Homogenization makes vegetables, fruits, cereal and soup so fine and smooth, they digest far more completely than the most carefully strained foods. Baby uses far less energy in digesting them . . . and gets far more nourishment.

#### 3. Earlier Feeding Possible

Many doctors recommend Libby's Homogenized Vegetables as early as 3 months . . . weeks earlier than strained foods . . . to give baby the minerals he needs to help protect against nutritional anemia. (Homogenized vegetables are so fine they may be mixed with baby's milk formula and fed from the bottle!)
